Cognizant

Sl No.	Name	Aptitude Test	JAM/GD	Interview experience	Technical Subjects	Other Comments
1	VIJAY C	It consists of 3 sections that is Quantitative aptitide , Reasoning and Verbal ability and level of questions is Average	No GD /JAM	It was good. 1.The interviewer firstly asked tell me about yourself 2.He gave 3 Reasoning questions and told me to solve 3.He asked about the projects which I have mentioned in my Resume and asked about the technical seminar which mentioned in resume 4.Interviewer asked some core topic questions based on Transformers and Generators 5.Asked one coding question 6.Difference between Global variable and Local variable in python 7.finally he asked me that do u have any questions	Python ,Java and C basics	Interview was good. Be confident when the interview is going on and keep smiling throughout the interview
2	SHIVA TRIPATHI	The Round1 for GenC select consisted of 1. Quantitative Aptitude 2. Logical Reasoning 3. Verbal Section		Q1. Tell me about yourself. Q2. Do you know any foreign languages ? Q3. Tell me your strengths and weaknesses? Q4. Tell me about cognizant? What kind of role are you supposed to play in the company?	Q1. Tell me about yourself Q2. Tell me about your Projects , what are the challenges you faced while working on it and what is your role in the Projects? Q3. Being an Electrical and electronics student why did you want to choose the IT sector? Q4. Do you know coding , if	

					yes what language would you like to prefer? Q5. Write code of Prime number, fibonacci series with two logic . Q6. Core related questions- Why we use capacitor in fan, what is transistor and what are its real life applications, what is diode , what is rectifier, what is Transformer what are the losses in transformer , Two way switch working , What is motor, types of motors ? Q7. Internship- Tell me about your project? What are things you saw or experienced for the first time in real life there? Q8. Aptitude question - 5 questions were given from percentage,probability,time	

					and work,arithmetic progression and Profit and loss.	
3	Harish S	Verbal Ability, Numerical Ability, Quantitative Aptitude, Logical Reasoning.	No JAM, No GD.	Mainly they ask about projects which u did in current academics, whether you are flexible to work in shifts & under pressure, then they ask about the personal questions like your hobbies, strengths, weakness & about yourself and in technical part they ask about basic theory questions in the coding languages which you know and they ask the logic behind the question they give and rarely they ask to execute the program.	Coding in languages you know	Not to get tensed, stay calm, talk in a way so that you convince them that you are good at whatever you do. Just be confident while answering, Speak boldly,
4	JYOTHI H J	Aptitude test consist of Quantitative aptitude, Logical Reasoning, verbal ability. Moderate to difficult	NO JAM /GD	We have 2 rounds of interview one is technical and other is HR. In technical interview only one interviewer was there,first He introduced himself and then asked me to introduce myself.After that he asked 3 programs to write and compile.As I mentioned C and JAVA in my Resume.He asked some OOPs questions and C Programming related questions and about projects. Other was HR interview,for me its just document verification and questions are like comfortable to relocate and any foreign languages u know and it was great. And must prepare some basic HR questions.	C, Basic concepts of OOPs and DBMS	first round can be cleared easily practice all aptitude topics,and for interview practice some basic programs, Be confident,Make sure you know each and everything what you have mentioned in your Resume. Know each and everything about your projects .
5	Mukta Chaturvedi	The Round1 for GenC select consisted of • Quanti		Q1. Tell me about yourself Q2. Tell me about your projects Q3. Which programming languages do you know?	The Interview was scheduled on the Superset platform. Q1. Tell me	Be confident in what you speak. Make sure you are thorough with

		tative Aptitude (Basic Mathematics) • Logical Reasoning (Deductive Reasoning and Inductive Reasoning) • Verbal (Vocabulary, Grammar, Comprehension)		List out the difference between these programs. Q4. Are you willing to relocate? Q5. Can you tell me what leadership means to you? How would you treat your team members? What if one of your team members doesn't obey you. How would you react on this? Q6. If we give you an opportunity to internship program will you take up?	about yourself. (This is a very common and an important question. As they test your communication skills, and the way you present yourself) Q2. Tell me about your projects. (Be confident about your work, start with basic introduction of the project, the objective and future work. Do Not over speak about any topic. Be precise) Q3. Why do you want a Software job being an Electrical Engineer? (Here I spoke about my interests in Computer subjects & I also mentioned I have good knowledge in both the streams. He then started asking me about my core subjects) Q4. Core related questions- What is a diode? What are flip flops? Why different	the concepts mentioned in your resume. Good Luck!

					gates are used in them? Major difference between a generator and an alternator? With real life examples of above mentioned questions. Q5. 3 Moderate level Aptitude Questions Q6. 1 Coding Question- Find the largest of 2 numbers (He also asked me to explain what are the different types of header files and logic used in the program) Q7. Are you giving interview for the first time? How confident are you with your performance? Q8. Are you willing to relocate?	
6	Noor ulfath	I had my aptitude i.e cognitive assessment round on 4th September 2021. After clearance of this round there was technical interview round.	Not applicable for genc role.	I had my interview scheduled on 29th sept 2021. The following questions were asked in my technical round of interview : 1. Introduce yourself? 2. Tell me about your projects? 3. Asked me to code live for prime numbers and swapping program. 4. What is a pointer? What is null pointer? 5. Difference between	C Programming Python Java	I would like to give some general tips to crack interviews. 1. Make sure you knw each and everything what you have mention

				local and global variable? 6. What is C language? 7. Differrent types of in built data types in C ? 8. What is a structure?difference between structure and function. 9. Type of data structures? 10. What is an array? What are different types of memory allocations? Give exaamples. 11. What is malloc and calloc. 12. Name different type of errors we come across in coding? 13. 4 aptitude questions were asked on time and work, ages and etc. 14. Explain me your core project. 15. What is an alternator? What is generator? 16. Tell the components used in your project? 17. Explain how a transistor works? 18. What is semiconductor? 19. What is amplifier? 20. Do you have any questions for me?		ed in your resume. Do not fake anything in your resume 2. Stay confident and work on having good communication skills. 3. To crack this round of interview the most important thing was to stay confident and to not loose hopes. To be patient and answer as per your known skills.
7	Vaishnavi K	Quants, Reasoning, Verbal	No JAM/GD	I was asked few questions on my resume, and few technical questions related to python, DBMS	Python, DBMS	Be Confident with whatever you know
8	Aditya Vishwakar	The Round1 for GenC select		Q1. Tell me about yourself Q2. Which programming	The Interview was scheduled	Be confident in what you speak.

	ma	consisted of • Quantitative Aptitude (Basic Mathematics) • Logical Reasoning (Deductive Reasoning and Inductive Reasoning) • Verbal (Vocabulary, Grammar, Comprehension)		languages do you know? Q4. Are you willing to relocate? Q5Do you Know any Foreign Language? Q6. If we give you an opportunity to internship program will you take up?	on the Superset platform. Q1. Tell me about yourself. (This is a very common and an important question. As they test your communication skills, and the way you present yourself) Q2. Tell me about your projects. (Be confident about your work, start with basic introduction of the project, the objective and future work. Do Not over speak about any topic and be precise. **My over all interview was based on my IoT project approx.25 mins**) Q3. Core related questions-C Programming codes (orally) she asked how will you execute a.Odd values b.Infinte loop With real life examples of above mentioned questions. Q4.What are Pointers? Q5. OOPs(be precise and tell if	Being subtle and minimum will be appreciated. Make sure you are thorough with the concepts mentioned in your resume. **Youtube Channel** which Helped me:- 1.Tech and Target 2.TalentBattle.in Good Luck

					you know if not say No straight forward) Q6. Are you willing to relocate? Q7. Are you giving interview for the first time? Q8. What are your weaknesses?	
9	Pallavi KM	Verbal & non verbal,logical reasoning,	NA	Must focus on projects and be thorough with resume.	C programming,python.Be prepared with simple definition and programs in C.	Be confident ,don't get panic.
10	Gayathri S	Quantitative Aptitude, Verbal activity and Logical reasoning,	No JAM/GD	Interview was of 20 minutes they asked about my projects and some coding questions. Then asked 3 Quantitative aptitude puzzle to solve and some HR questions were asked like "about company" and our abilities.	Basics Of programming and some Core related topics	Should be confident and honest
11	NISHANTH REDDY M S	Basic easy questions all numericals	No there	Interviewer was cool he started withe introduction of u r self He asked me about project Role in project Problems faced in project How u solved the problems faced in project 3 Aptitude questions Questions java oops concepts Basic java questions	Coding on prime number Questions on core branch Difference between alternater d generator Difference between microprocessor d microcontroller Types of microprocessor	Quite easy
