ITC Infotech

Sl No.	Name	Aptitude Test	JAM/GD	Interview experience	Technical Subjects	Other Comments
1	Siddharth Shendge	The Aptitude round lasted for about 60 minutes (20 Minutes for Code Debugging and 40 Minutes for Aptitude + Logical + Verbal). 7 code debugging questions. 15 aptitude & logical reasoning questions each and 10 verbal ability questions, all MCQ format.	No JAM/GD round conducted	The test result was declared immediately the next day and the technical interview round was scheduled 2 days later. The interview lasted for 20-25 minutes and the interviewer asked only resume based technical questions. At the end the interviewer also asked to present the screen and type a program for string reversal using any programming language of my choice. The very next day, a telephonic HR conversation took place where the HR just discussed about the salary, further process after joining and job location preference.	Python intermediate knowledge, Object Oriented Programming in Python. Knowledge in Basic programs such as String reversal, Factorial number, Fibonacci series, Prime number, etc., in any programming knowledge.	Make sure that you are 100% through of your resume and you have sufficient knowledge in programming languages as the aptitude and technical round are the only rounds that matters in this company.
