All companies expect everyone to have basic knowledge of Object-Oriented concepts from Java, Python & C++ and simple programs in any one of the languages.	Technical questions based on skills provided in resume is asked.

		Coding round (2 questions within 60 min's).				
4	VIJAY C	It consists 3 sections that is quants reasoning and coding round	No GD	Firstly, the interviewer asked to show any Id proof Asked about the project and told me to explain Asked some basic technical questions Asked any education gap in studies Asked about the bond of Wipro Why core to IT field Finally asked any questions And the interview was about around 15 to 20 min	C and Python	Be Confident while answering the questions and keep smiling
5	JYOTHI H J	Aptitude test consists of quantitative, logical, verbal ability and 2 coding questions and one easy and other is moderate level.	No JAM/GD	we have only one interview in that both technical and HR ques were asked. For me there is no technical questions just he asked some HR ques and more situational based questions. From this, situational questions they will get to know how u handle situations and u are suitable or not. At the end of the interview, I asked what u are expecting from a fresher and he told good communication skill and leadership qualities.so Be confident and must prepare some basic HR questions.	C, BASICS OF JAVA	practice all aptitude topics and know each and every thing what you have mentioned in your resume.
6	Vignesh S	It consists 3 sections that is aptitude reasoning and coding round	No Jam/Gd	Firstly, the interviewer asked to show any Id proof and asked introduce yourself Asked about the project and told me to explain Asked some basic technical questions (oops and data structure) Asked any education gap in studies Asked about the bond of	Python	Be Confident while answering the questions

				Wipro Why core to IT field Finally asked any questions And the interview was about around 15 to 20 min		
7	Afsa Firdous J	On 27th sept 2021, I had Wipro online test at 5:00pm. The test is divided into 3 sections: Aptitude, Essay writing, Coding. The questions were based on quantitative ability, logical reasoning, essay writing, coding.		On 13th oct 2021, I had my interview, firstly the interviewer asked me to explain about myself and projects, then the interviewer asked me about my hobbies, and questions on programming concepts in c, oops, based on sql, etc. I tried to answer all the questions in positive manner. Then the interviewer asked me to present the screen and asked to code the program in my preferred language in which I am comfortable with. And I tried coding and successfully passed all the test cases.	C/C++, java, sql, data structures, networking concepts, web development concepts, etc.	-
8	Navitha Shree K S	Aptitude was quite easy, prepare for quantitative, logical reasoning, puzzles.	NA	My interview includes both HR and Technical rounds they ask some basic c programming questions, HR round was quite easy they asked about myself, projects and about resume and also some basic HR questions.	C programming	Prepare well for aptitude round and projects and mainly about your resume
